About NSD

In recognition to the notable contributions made by Prof. P.C. Mahalanobis in the fields of Statistical Planning and Training as well as Economic Development in the post-independent era, the Govt. of India decided to celebrate 29th June, coinciding with his birth anniversary as Statistics Day at the national level. The notification was published in the Gazette of India on June 5, 2007.

About SMS

The School of Mathematics & Statistics (SMS) was established in 2020 for providing teaching, research and training in theoretical and applied areas of mathematical sciences with interdisciplinary applications. In the present data driven world all types of research, decisions and planning are deep rooted in mathematics and statistics. The Institute aims to emerge as a leading centre of teaching, learning and interdisciplinary research in mathematics and statistics.

About SDA

The School of Data Analytics (SDA) was established in 2020 for imparting teaching and training in fundamental as well as interdisciplinary areas of application and research in the frontier areas. The present era is an era of information technology and data analytics. High demand for experts in data analytics, data science and artificial intelligence is felt in planning, research and development, industry; health diagnostics, epidemiology, business and management, banking and insurance, defense, transportation etc. The School of Data Analytics is established for ensuring high level research and employment potential for our students and to meet the demand from industry and multinational companies.
