School of Mathematics & Statistics
Mahatma Gandhi University Kottayam

The School of Mathematics and Statistics is established for promoting teaching and research in theoretical and applied areas of Mathematical Sciences with interdisciplinary applications. In the emerging data driven world, all decisions and planning are deep rooted in mathematics and statistics. In the present era of increasing thrust on interdisciplinary applications of Mathematical and Statistical Modelling, there is wide scope and potential for postgraduate and research level interdisciplinary programs in these disciplines. One full semester Project Work and Internship are part of each program and will be carried out in reputed industries / national level institutes / universities etc. giving wide exposure for research and on the job training.
